James Hatcher, 8301 W. 92nd Terrace, Overland Park, KS, 66212.

### Mason-Dixon Chapter

Phillip Cottrill, 131 Ash Lane, Elkton, MD, 21921.

### The Northeast Chapter

4 Faith Street, Burlington, VT, 05401.

## OTHER CLUBS OF INTEREST

The Ford Falcon Club of San Diego, P. O. Box 3306, San Diego, CA, 92103.

The Ford Falcon Club of Los Angeles, 4873 West 134th Street, Hawthorne, CA, 90250.

The Ford Falcon Club of Arizona, 10209 N. 64th Street, Scottsdale, AZ, 85253.

Fairlane Club of America, 212A Pilgrim Ln., Drexel Hill, PA, 19026.

The Ranchero Club, 1339 Beverly Rd., Portvue, PA, 15133.

Comet Club, 2520 Homewood Place, White Bear Lake, MN, 55110.

NOTE TO ALL MEMBERS: The club will send out notices to each member the month before membership expires. Be sure to send your renewal in early to retain your original membership number. If you do not renew your membership within 90 days after it has expired, your membership number will be placed in the inactive file and will no longer be used by the club.

All pictures this month (except the one on p. 13) are from a recent gathering of Mid America Falcons a chapter of FCA located in KS. Here's Jim Hatcher's Sprint. Lookit the tag.

## President's Message

With this year almost gone, I would like to thank each member for the support you have given me during the last year. I feel we have had a great year in the club. It seems every year the club gets bigger and better and without members like all of you out there, it wouldn't be that way.

There is a couple of things I would like to talk about this month. First is about insurance for your Falcons. Did you know that if you don't use your Falcon everyday that it may qualify for classic auto insurance. Most companies have a special classic policy that can be very affordable to most of us Falcon owners. For example: I have insurance on my 63 conv., full coverage Liability 100/300/100, UM 25/50, Comprehensive, Collision and Towing. It only costs \$33.00 for 6 months. This policy also states the value of the auto so that in the event that something happens there will be no question as to the value. Check into it if you have a nice little Falcon that you think is worth a few dollars each six months.

I talked with our Editor and if any members have had a Falcon stolen, notify Harold or myself and we'll get a note in the News for members to be on the lookout.

I talked to Tom O'Dell about the National Meet in 1984 and it sounds like they are going all out to show all of us a great time. If there's anyway possible, start making your plans now for next August.

I talked to Barby Brunken last night and he informed me that the National Meet information on the 1983 Meet is on its way so Ruby can finish the 4th Annual Meet Booklet and get it in the mail. Some of the new members might not know that each year after the National Meet we publish a Special Book for that Meet. (Back copies of these books for the 1st, 2nd and 3rd National are now for sale at \$1.25 each. Send orders to Pat Sword and be sure to state what issue you want.) (1980-1981-1982 available)

Will close wishing all of you a Merry -- Merry Christmas and a Happy -- Happy New Year!

President, FCA  
Roy E. Sword

## From The Editor

If there's proof of the old adage "you can't please all of the people all of the time" in the old car hobby, it might be found in the area of concourse judging. Many times I've seen poor cars decorated and very good cars go home losers. To illustrate the point, let me set up a hypothetical Falcon meet where there are 20 excellent 63 convertibles, 5 fair to middle examples, and 2 that are so-so. In addition to all of those cars, there are two superb '69 sedans, one shabby 68 sedan, and one fair 66 sport coupe.

In most of the competitive judging I've experienced, only three of the 20 excellent convertibles will get anything. The other 17 of the excellent get nothing; the five fair ones get nothing, and of course the two get nothing. A lot of hard work simply not recognized. The two superb 69 sedans: one would get first place and one second place. Which got which trophy would be largely a function of accident. The '68 sedan would get a first place--even though it deserves nothing, and the '66 would get a first place.

To me the above scenario--which accurately describes most car shows I've attended--is very unfair. If a competitor enters a tough class, his car has to be perfect to obtain any recognition. On the other hand, if the class is almost ignored, a first place is virtually assured with no effort.

However, I once witnessed a system that I think eliminated the inequity of the old way. Its principle is rather simple: each car should be judged on its own, and not in competition with any other car at the show. And it works.

In the above example, two or three judges would be assigned to the '63 convertible class. They examine each car as a group and decide among themselves whether the car is top flight, second flight, or merely an "also ran". There is no limitation in any class as to how many or how few top or second flight cars there are. Perhaps in my example, all 20 of the excellent convertibles would be top flight, or perhaps, ten would be top and ten would be second. Maybe some of the five fair ones would be second flight. As for the two superb '69 sedans, they would both probably be top flight, and so forth.

Under this system, a top flight car has much to be proud of irrespective of how many cars were in the class, what year the car is, or any other irrelevant factor.

If the Falcon Club of America is to adopt concours judging at its events, and I urge it to do so, I hope that it adopts a system which awards excellence on that basis alone.

More Mid America  
Falcons!

## Shorts

\* \* \* \* \*

Last month I optimistically predicted that we would get back on schedule. This month I'm not so confident. The Falcon News is quite cruel in its demand for time.

\* \* \* \* \*

Our Rocky Mountain Chapter forwarded their news letter recently. The newsletter is excellent and it looks like the RMC is a dynamite club to be in. If you're in their area, it would pay you well to check 'em out.

\* \* \* \* \*

This issue we'll have a bit more Fordomatic and a bit more from down under. Hope you enjoy--sorry it's late.

More on the four wheel drive Ranchero: I received the following letter from member Bob Cawley in New South Wales, Australia:

Dear Harold:

The photograph of the 4-wheel drive Ranchero on page 7 of the September issue of "The Falcon News" immediately reminded me of an Australian 4 x 4 Falcon utility (pick-up as you call them!) which actually saw production.

I thought that the Australian 4 x 4 Falcon may interest members so I wrote to Ford, Australia to clarify and expand some facts and figures.

The 4 x 4 Falcon was produced in the "XY" series body shell, 11 being built in December, 1971 and approximately 200 in early 1972, before introduction in February 1972 of the sleeker "XA" model, the first entirely Australian designed body. This would mean that the 4 x 4 utility was assembled before the "XY" production line was changed over to the "XA" model, however the 4 x 4, built and sold in the State of Queensland, was sold from January, 1972 alongside the "XA" Falcon body style.

Falcon 4 x 4 utilities were powered by the 250 C.I.D. 6 cylinder Falcon petrol engine with a compression ratio of 9.3:1, 155 SAE gross H.P. at 4000 R.P.M. and 240 ft. lb torque at 1600 R.P.M. Power was transmitted by a warnner model AS5TI5A 3-speed fully synchronized manual transmission with floor mounted shift lever, with a spicer model 20 - 2 speed transfer case. The base vehicle weighed in at 3620 lbs and standard equipment included power lock free-wheeling front hubs, tonneau cover, sump guard and fiberglass front spoiler. Options included front power winch, rear tow bar and high canopy.

I trust that the above is of interest and included are photocopies of photocopies I received from Ford, Australia. The picture on the specification sheet may be reproducible.

Looking forward to the next issue of "The Falcon News."

Yours sincerely,

Bob Cawley  
Member #1551

Unfortunately, the reproduced copies of the literature are not of such quality as to print well here. The pictures are interesting nonetheless. The front fenders appear to be '65 Falcon, and likewise the hood, doors, all glass, roof, and cab area in general. The rear quarters and rear lights appear to be identical

to the 1971 Falcon pictured on page 9 of the August FN issue. The grille resembles a mid seventies Olds Cutlass. The interior is quite modern with sunken gauges much like an early seventies Torino. Amazingly, there is an air dam up front, which gives the whole package a very sporty look. My thanks to Bob for forwarding the Australian Falcon information.

Incidentally the Ranchero Club (listed in our other clubs of interest section) did a really nice article about Ford Rancheros down under in Australia in a recent issue. Although its a bit off Falcons, in the recent PBS series "Masterpiece Theatre" they did Nevelle Shute's "A town like Alice" which was to have taken place shortly after WWII. There were many '30's style Rancheros some of which had extra room behind the seat.

Tachometer  
Service Ctr. - *Falcon*  
a NWCF  
exclusive!  
Tachometer repair/restoration  
conversion service for Sprint  
Rotunda tachs.

- Repair non-working tach (1 yr. warranty) - \$100.00 (Approx. 3-week turnaround)
- Restore working tach (new RPM/Sprint facelate & lens with flazs) - \$60.00
- Repair and restore - \$160.00
- Conversion (3" dial Rotunda) to Sprint - \$60.00; repair - \$100.00
- New Repo Items: Baseplate for 63 Sprint tach - \$25.00 (NW1)
- 65 Futura/Sprint gas cap plastic insert replacement kit - \$30.00
- 65 grill emblem - \$30.00
- 62/63 deck lid ornament plastic insert replacement kit - \$30.00 (available soon; advance orders accepted) (NW2)
- 60/63 Falcon heater gasket kit (HK2) (diecut foam) - \$5.95
- 64/65 Falcon/Comet heater gasket kit (HK1) - \$4.95
- Silver mylar door panel insert replacement material (not exact, but looks excellent; samples available): 62/63 - \$35.00 (front & rear); 64 - \$25.00 (f&r)
- Solid sterling Falcon pins (65 standard fender emblem) - \$9.95

Send SASE for inquiries. Add 15% for shipping, ins., handling if ordering.  
10% discount for FCA club members.

So much for the Fordomatic this month. I can still send you the relavant pages of the shop manual for \$1 and a large SASE. I really recomend that you obtain a copy before you start this project.

Next month we will no doubt finish up the job, as reassembly is a breeze.

What better way to haul their literature wares than Howard and Gladys' '62 Squire. It's always lived in a garage and it's without rust or Bondo. With 27,000 original miles what else is there to say?

## SERVOS

Now it's time to mount the servos in the trans case. The low servo assembly is the one at the front of the case; the reverse is at the back. The low servo looks like a small umbrella and its stem is permanently attached. Its spring is much smaller in diameter than the reverse spring. Despite my advice to you to keep them separated, when I did my trans for this article I mixed them up!

1. Install a new seal around the outside diameter of the servo piston. Get a new seal for the cover and put it in place on the cover. Put the spring in first, followed by the piston and the cover/seal. Install two 5/16ths bolts about 1 1/2" in opposite corners of the cover and draw it down about half way. This draw down should compress the spring.

2. locate two of the correct bolts and put them into the remaining holes; tighten them down until the cover is about 1/8" away from the case. Remove the longer bolts and replace them with the originals, and tighten down the cover evenly.

Now we'll tend to the reverse servo. Again a picture is necessary.

FIG. 25—Reverse Servo Piston and Band Apply Linkage

I'm not going to handle this section step by step because I have noticed some variations between the V-8 and the six cylinder engines. Note well, however that in this case, the spring goes in after the piston. You can use the same long bolt/short bolt technique set forth above to compress the spring.

## UPDATE:

**February 11, 1984** The Founder's Chapter will have a meet at the home of Jim and Peggy West. This will be a potluck dinner and everyone is invited. For more information on this call Jim West 753-1558 or Linda Acrey at 676-3384.

\* \* \* \* \*

## Meet Report: From The Founder's Chapter

The Founder's Chapter of The Falcon Club of America held a meet on Saturday November 5th in Jacksonville, Arkansas. Pat and Roy Sword hosted the meet at their home.

Members at the meet were: Glen and Linda Acrey, 64 HT; Jim and Peggy West, 60 Ranchero; Tex and Jean Stanley, 62 Ranchero; Mark Sword's 64 HT; Frank Spinelli and Family, 62 2-dr.; Roy and Pat Sword, 63 Conv.; Members in Brand X's were Jim Throgmorton and Larry Sword.

A short business meeting was led by President Linda Acrey. After the meeting, club members traveled to the Western Sizzler where they dined in the banquet room.

The next meet is planned for Saturday, February 11, 1984 at the home of Jim and Peggy West's house in North Little Rock, Arkansas. A potluck supper will be held. Please remember that date and plan to attend. Visitors are always welcome.

Here's the turnout at the mid America Falcons. Incidentally, as Phil Warren, secy-Tres of the club says, Falcons were built near Kansas City at Claycomo, Mo., so there's plenty of Falcons around.

# technical tips

10

## FORDOMATIC REBUILD CONTINUED

At this point you should have the transmission spread out all over your work area. I always try to keep the thrust washers with their appropriate subassemblies for simplicity. All of the subassemblies should be clean. The case and extension housing should be clean, and the valve body should be set aside and ready to go having been cleaned with WD-40.

I really recomend that you obtain the technical manual for the transmission. I hope this article fills in and clarifies some of the ambiguities in the shop manual, but the pictures in the manual are worth thousands of words.

Since we'll be dealing with the clutch first, and since it's a bit tricky, I'm going to include a picture here.

FIG. 13—Clutch Drum and Piston

D1184-A

FIG. 10—Clutch Plate Pack Assembly

FIG. 12—Clutch Piston Removal

11

Take a look at fig 10: there are two driving plates J located in the clutch. We are going to replace them both. In figure 13, we will replace items B and C.

1. remove the snap ring that retains the forward sun gear and flange in the clutch drum. Remove M in fig 10 which will allow you to remove L and K. Sometimes there is a thrustwasher that has a flange on it. Note the position of the washer because it is not depicted in the illustration.

2. Now remove both J's and I's.

3. At this point you will be looking at a sub-subassembly just like that depicted as H in fig 10. Place this unit in a bench vice vertically and place two deep sockets against item F, the spring retainer. Turn down the vice until the snap ring G can be removed. loosen thevice, being careful because the spring E will expand quite a bit.

4. Now you will remove D from A. This you can do by placing H as an assembly on to stator support (see fig 12) and blowing out D with air pressure. Be careful, it comes out fast.

5. Way back at the beginning of this series I mentioned two 50cent "O" rings that kept the trans from shifting to second. Their time has come. replace both B and C. C is easy to see, but B is cleverly hid around the inside diameter of A where I have it marked with an \*.

6. Reassembly is, of course, the reverse. It is a little tricky to get F down over A correctly. Just be careful not to warp F.

7. When you have reassembled so that the sub-sub assembly looks like H again, locate your new clutch plates, also known as driving plates, and labled J. Soak the new plates in fresh automatic transmissin fluid for about fifteen minutes. If you have decided to use the old ones, either do not clean them, or soak them similarly.

8. Plunk the I's and the J's back in, followed by the thrust washer (if there was one) and K, L, and M.

9. Set the rebuilt clutch aside and pat yourself on the back--the hardest part is now over.
